MicroWorld announces the release of its eScan range of Anti-Virus and Content Security software products in Italian and German language.

MicroWorld Technologies, Inc., developer of Information Technology, Content Security and Communications Software announced the release of its eScan range of Anti-Virus and Content Security software products in Italian and German language.

/24-7PressRelease/ - FRAMINGTON HILLS, MI, September 29, 2005 - Until now eScan was available for download in English and Spanish languages. With MicroWorld increasing market share in the European markets and to cater to the need of their products in localized languages, MicroWorld has felt it necessary to have an Italian and German versions for their existing range of software. The release of eScan in Italian and German language has been highly appreciated by its partners and resellers in Europe.

The following eScan range of products are available for download in Italian and German language;

eScan Virus Control Edition, eScan Professional Edition, eScan Internet Security Suite, eScan Corporate Edition, eScan Corporate for MailScan, eScan Anti-Virus Edition, eScan Corporate for Citrix, and eScan Enterprise for Microsoft SBS.

MicroWorld Technologies Inc. is the publisher of world's first real time antivirus and content security software eScan and MailScan, for desktops and Mail Servers respectively. Headquartered in Michigan it has its development centre in India which Asia-Pacific and Europe headquarter. MicroWorld has presence in more than 74 countries today and reselling through a channel network of more than 13,000 Resellers, Distributors, Security partner and System Integrator.

MicroWorld's Revolutionary "MicroWorld-WinSock-Layer (MWL)" technology, the first of its kind in the world. It deals with these threats before they enter your network, in the same way that a firewall controls user access.

Our products, eScan and MailScan are reliable and time tested products and have been awarded some of the most prestigious awards and certificates in the internet security industry. These have been successful in fighting the epidemics like SOBIG and the recent MyDoom attack.
