MicroWorld has released the Beta Version of eScan 10

New Delhi, November 13, 2008 – MicroWorld, the leading AntiVirus and Content Security solution provider, released eScan 10 (Beta Version), the AntiVirus and Content Security Solution. eScan 10 provides comprehensive protection against Viruses, Worms, Trojans, Spyware and other Security Threats and also protect from threats infecting via email, web downloads, chatting etc. by its faster and heuristic scanning ability. The inbuilt Advanced Firewall also prevents systems from network based attacks. eScan 10 is packed with a host of proactive technologies and advanced algorithms and packs a powerful combination that will help you thwart all Information Security threats.

On the release of eScan 10 - Beta version, Govind Rammurthy, CEO & Managing Director of MicroWorld, commented, "The IT Sector is continually at risk for malicious attacks resulting into vital requirement of modern reliable IT Security Solutions and release of eScan 10 (Beta Version) is a step forward in this direction which will definitely add great value to the field of Information Security."

He further said, "eScan10 (Beta Version) as compared to eScan version 9 includes a range of technical advancements which substantially enhances the software's functionality and scanning rate. Our latest IT Solution is also designed with user friendly interface which navigates all types of users with varied level of technical knowledge. By launching eScan 10, We commit to provide our customers the most secure IT Solution against all kinds of existing and emerging security threats."

Features:

The eScan 10-Beta redefines internet safety with its proactive security, as well as file monitoring which is intelligent and faster. The eScan 10-Beta version with its advanced scanning and heuristic scanning takes it a step ahead than any other Anti Virus software as it is faster and more competent. It also offers a new User Friendly GUI that appeals to both novice as well as expert customers; besides this it also offers Parental Control / Internet Patrolling, AntiSpam, AntiPhishing and a lot more apart from its inheritance from its previous version.

The Beta Version of eScan 10 is available for Public to download at the below link and Active Beta testers stand to win exciting prizes from MicroWorld.
