MicroWorld launches MailScan 5 for mail servers

By ZDNet Staff, January 23, 2007

 [Talk Back](#)  [E-mail](#)  [Print](#)

MicroWorld Technologies launched MailScan 5 for mail servers, the comprehensive mail security solution, at the Mail Gateway of organizations and business houses.

Said Govind Rammurthy, CEO, MicroWorld Technologies, "If you are talking about a comprehensive, end-to-end protection for mailing systems, it ought to be right there at the Mail Gateway. With the new version of MailScan, we empower the mail administrator with some future defining technologies that can intelligently detect and block all kinds of malicious programs in mails, filter out spam with impeccable accuracy and enforce a comprehensive mail security policy for the entire organization. While we sharpen our precision in nailing down individual challenges in email security, never do we lose sight of the complete picture."
