MicroWorld Releases Beta of eScan 10

By CXOtoday Staff

Mumbai, Nov 13, 2008 1828 hrs IST

The Internet has become an indispensable business tool, but using emails, Internet messengers, etc. can leave you susceptible to malware attacks. MicroWorld has released the latest version of its eScan anti-virus solution.

eScan 10 is currently available as a beta version. It features heuristic scanning ability and an in-built firewall to protect systems from network attacks. The company says eScan10 provides protection against all forms of threats.

According to the company, the new version sports a new user friendly GUI, as well as parental control, Internet patrolling, etc. eScan 10 beta is available for download to the public.

CXO VIEWS

Achieving Success in the Big, Bad World of Retail

The retail sector is tough and competitive. The difference between success and failure boils down to three things -- people, process, and technology.
