

# eScan Virus Control Edition

eScan Virus Control is a desktop Anti-Virus and Content Security software for Windows based systems that provides essential protection against threats like **Viruses, Spyware, Adware, Malware, Keyloggers, Hackers, Spammers**, privacy related issues and **Objectionable content**.

## How it works?

eScan uses MicroWorld's Winsock Layer (MWL) Technology to block security threats at the Internet Gateway itself, way before they enter your system. eScan's e-mail & web scanning engine combines with MWL to use real time scanning to check for virus threats and restricted content in e-mails, attachments and websites.

## Features

**Real-Time Virus Scanning** - It Scans e-mails and websites real-time, including SMTP, POP3, and HTTP traffic. The Anti-Virus component uses detection and disinfection to protect your system from Viruses, Worms, Trojans, Spyware, Adware and Keyloggers.

**Real-Time Content Scanning** - User customization refines and enforces Spam control in e-mails, resulting in savings of Mail Server space, effort and time.

**Secure Sensitive Data** - Stops confidential data mailed as attachments. Features allow the user to customize Attachment types.

**Pop-up Filter** - Blocks annoying Pop-ups and saves system bandwidth. Features allow the user to set website-specific Pop-up Blocking inclusion/exclusion lists.

**Protection Against Intruders**- It comprehensively protects you from intruders like Spyware, Adware, Malware, Keyloggers and Hackers.

**NetBIOS Firewall** - This firewall ensures that remote users from external computer systems are stopped from creating or modifying certain file type(s) (.exe, .dll, etc.) of the Operating system or any user specified folders.

**Privacy Control** - Protects your privacy by erasing links to visited sites and prevents access to personal information. Features allow the user to schedule browser clean up for Cookies, Plugins, ActiveX, History, Cache, and links to most recent files/images opened.

**Spam Killer** - Feature allows the user to customize e-mail Content scanning and set actions (Delete/Quarantine mail) to block Spam mails from clogging the mailbox, and also customize the process using phrases and words.

**TCP Connections** - It is inbuilt network monitoring tool that examines TCP/IP activity on your Windows-based systems. Lists all TCP and UDP endpoints on your PC, including the remote address (along with Domain name of the remote address) and state of TCP connections.

**Frequent Updates** - eScan reacts swiftly to emerging threats like new viruses, and malicious software like Spyware, Malware, and Adware. We release anti-virus database updates every hour, and the Spyware signature updates as often as three times an hour.

**24x7 Free Technical Support** - Online (Chat), telephonic and e-mail technical support is available free of cost round the clock for all MicroWorld products.

## Approved and Certified by

## Available Platforms:

Win 95/98/NT Workstation/ME/XP Home/XP Pro  
Also supports Windows 2000 Professional.

## Minimum System Requirement:

- For Windows 95/98 - Pentium Processor, 32-64 MB RAM, 100 MB free HDD space
- For Windows ME/NT/2000/XP - Pentium II, 64-128 RAM, 100 MB free HDD space
- Also supports AMD/Cyrix Processors

## Available languages:

English, German, Italian, Spanish, Polish, French Chinese and Portuguese versions.

30-day evaluation software can be obtained from <http://www.mwti.net>.
