## MicroWorld's eScan Corporate Wins Yet Another VB100%

eScan has been awarded VB100% in the comparative test.

EFY News Network

**Wednesday, February 06, 2008: eScan Corporate from MicroWorld, a security solution that combines antivirus, antispam and content security in one product suite, has once again won VB100% Award from Virus Bulletin in a comparative test conducted on Windows Server 2003. In the February review, the software showed excellent test results in malware categories like In the wild, file infector, polymorphic, worms and bots, DOS and macro.**

advertisement

**"It's quite gratifying to know that eScan has been awarded VB100% in the comparative test. The Virus Bulletin test is regarded as an absolute benchmark in the security industry and this result stands testimony to the effectiveness of our technologies and accuracy of Virus detection. We also realise that the award puts the onus on us to continue to maintain and exceed the quality standards of our product," said Govind Rammurthy, chief executive officer, MicroWorld.**

**New version of eScan Corporate has a management Console which now provides options for installation, administration control, deployment of updates, upgrades and licence keys, enforcement of security policies, covering rogue machines and more. The new Application Control feature is used for controlling and blocking all unproductive and harmful programmes in an organisation's network. The network monitoring tool TCP Connections now shows all active connections and established connections in the system.**
