[WEBINAR - The importance of mobile computer durability and ergonomics. Why rugged devices cost less.](#)

26 July 2006

An Interactive Business Communications production

Lured by lower initial prices, mobile computer buyers sometimes choose commercial devices over more-rugged industrial devices however, research demonstrates that commercial devices don't hold up well in warehouse and transportation use—and cost considerably more than industrial devices in the long run.

Warehouse Management

[More Stories](#)

[Food industry QA managers influence technology selection](#)

24 July 2006
More than half of all quality assurance (QA) managers in

food manufacturing do not currently interface with their company's enterprise resource planning (ERP) system. Thomas R. Cutler discusses the implications. [full story](#)

[Grid and SOA – Friends or Foes?](#)

14 July 2006
There has been much coverage in the press recently over two architectural approaches to technology: grid computing,

where hardware assets are virtualised so that applications can share resources, and service oriented architectures (SOAs), where discrete items of functionality are created that are brought together on the fly to meet the business' process needs. [full story](#)

[ERP not delivering? Try looking at it from a different perspective](#)

4 July 2006
For many manufacturing companies, the

use of enterprise resource planning (ERP) systems has become a necessary condition for success. But the complexities of today's more demanding manufacturing strategies call for ever greater visibility and control over every process. [full story](#)
