eScan wins VB100%

by Marketflash Bureau Pune

Aug 18, 2007

Microworld Technologies announced that its eScan, the AntiVirus, AntiSpam and Content Security products have won the VB100% award in a test conducted on Windows Vista x64.

VB100% employs a comprehensive pool of virus samples in the Wild while evaluating various products. The award is given only to those products that pass the parameters set by Virus Bulletin and detect all 'In the Wild' viruses, both on 'On Demand' and 'On Access', as well as give no false positives.

“Each time eScan wins the award from Virus Bulletin, we take it as an authoritative reassurance on the way we are advancing our product in technology and architecture,” said Govind Rammurthy, CEO, Microworld Technologies. He added, “Our continued effort is to mix proactive and reactive technologies in malware and riskware protection, and this test is an assured way of sizing up the overall effectiveness of the end product. We are honored that we consistently live up to the VB100% standards!”

As per the press release, eScan has already bagged certifications from almost all well known testing bodies of the IT security industry like Checkmark, AV comparatives, CheckVir, PC Magazine, Tucows and 5cup among many others.
