MicroWorld Technologies, Inc. Debuts eScan With MicroWorld Winsock Layer (MWL) Technology at ShowStoppers/CeBIT America

- Company's Proprietary Winsock Layer Technology Is a Real-Time Gateway Content Security Check That Is Upgrading Content Security Management

OLD BRIDGE, N.J., June 18 /PRNewswire/ -- MicroWorld Technologies, Inc. (MWTI), a leading solutions provider for information technology, content security, and communications, today announced that it will be demonstrating eScan, the first real-time antivirus, content security and TCP-IP traffic scanning software package using its proprietary MicroWorld Winsock Layer (MWL) content security technology at ShowStoppers, surrounding CeBIT America on June 18, 2003 from 6 - 9 pm at the Marriott Marquis Hotel. ShowStoppers, producers of award-winning media receptions, connects companies with the best technologies with hundreds of journalists and decision-makers for in-depth interviews, demonstrations, and sneak previews.

MWTI's eScan 2003, the first real-time antivirus, content security and TCP-IP traffic scanning software package, and MailScan, a content security software for the corporate mail server, use proprietary MicroWorld WinSocket Layer (MWL) technology, which scans and checks Internet traffic and content on real-time basis including emails, attachment files and web pages.

"ShowStoppers provides us with a wonderful opportunity to demonstrate our technology and products to the top media, and ultimately educate new audiences about a new way in which content security threats can be managed in today's highly security conscious world," said Govind Rammurthy, managing director and chief executive officer of MicroWorld Technologies, Inc. "During the last year, we have increased our customer base exponentially, added up to 12,000 resellers, and become one of the leading antivirus software products of choice for customers worldwide."

About Winsock Layer of Windows (MWL)Technology

MWTI has developed its proprietary MWL technology based on the Winsock Layer of Windows-based applications, which is integrated with an antivirus scanning engine to perform real time virus scanning of all in coming and out going mail over the Internet. MWL performs a content scan of all contents being downloaded from the Internet on any system or network regardless of its size; and maintains sanctity of the network, by effective spam and rule-based policies, which prevent any intrusion by unauthorized persons, as well as the network administrator, be it a small network, a corporate network or an Internet Service Provider (ISP).

MWL analyzes Internet traffic and potential threats before they reach computer systems, as opposed to other solutions that deal with the threat

after they have infected computer systems. The checks are made for viruses, restricted words and phrases as well as for embedded objects like Java applets, etc.

About ShowStoppers

Founded in 1993, ShowStoppers produces award-winning media receptions that have helped more than 700 companies introduce new products to more than 7,000 reporters. Clients include SONY, Intel, Compaq, Lexmark, Logitech and many other industry leaders and category killers. ShowStoppers hosts events at CeBIT America, CES, Comdex and many other leading conventions and conferences.

ShowStoppers is the fastest, easiest, most economical way to meet the press. Sponsors get serious "face time" with reporters, editors and columnists from the very best business, computer and consumer publications -- as well as industry analysts, selected members of the investment community. For sponsorship information contact Dan Janal, 952-380-1554, dan@showstoppers.com or visit <http://www.showstoppers.com> . Reporters may contact Steven Leon, 310-670-5606 or steve@showstoppers.com or see <http://www.showstoppers.com> for attendance requirements. ShowStoppers is open only to bona fide reporters at top publications, radio and Television stations.

About MicroWorld Technologies, Inc.

MicroWorld Technologies, Inc. (MWTI), a leading solution provider of information technology, content security, and communications, provides protection from the threat of viruses infiltrating Internet communications and systems at large corporations, small enterprises and individual users. MWTI's products, eScan, an enterprise-wide antivirus software and MailScan, a content security software for the corporate mail server, use proprietary MicroWorld WinSock Layer (MWL) technology to scan Internet traffic on a real-time basis, and analyze Internet traffic and potential threats before they reach computer systems. The company has offices in the United States and the Asia Pacific Region, and a channel network of more than 12,000 partners and resellers across the world. The U.S. Corporate office is located at 109, White Oak Lane, Suite #93, Old Bridge, NJ 08857, USA; Tel: (+1) 732.607.7501/02, Fax: (+1) 732.607.7503.
