

MicroWorld a Front-runner at ITEC, Starting 24 May 2006

2006-05-23

The mega event of Information Technology, ITEC Exposition will kickoff tomorrow at Detroit, Michigan. One of the keenly looked forward to participants and a major draw at this Conference cum Exhibition, MicroWorld Technologies is all geared up to demonstrate their technological brilliance and innovative product range to the benefit of enterprises and business houses in the region and beyond.

ITEC is North America's largest series of Business-to-Business events. Held on 24th and 25th of May 2006 at Detroit, the exhibition is a targeted and effective marketing vehicle for local and national solution providers, VAR's, System Integrators and countrywide vendors to reach out to the IT and business community of the region. MicroWorld will present their latest range of solutions at the event, with live demonstrations.

"Our advantage is definite and tangible," says Rohini Sonawane, Chief Operations Officer, MicroWorld Technologies. "We've got the fastest detection rate for all kinds of Viruses, Trojan and other malware. Our prevention system is superior with the patent-pending MWL technology that enables our products to stop threats at the socket level. We've got centralized Outbreak Management and Security Policy Enforcement. Discerning customers across the world are now discovering these fundamental differences and I believe that's the driving force behind this wide-spread curiosity in our solutions."

Security products eScan, MailScan and X-spam from MicroWorld will be demonstrated at the expo. The flagship product, eScan is the comprehensive AntiVirus and Content Security solution designed to protect enterprises and personal computers against Viruses, Spyware, Adware, Malware, Keyloggers, Hackers, Spammers, privacy related issues and objectionable content.

On the other hand, MailScan is the total Content Security and Traffic Scanning software for Mail Servers, that checks email content and attachments for Viruses and other online threats. X-Spam is the world's best Anti-Spam Software that protects the Microsoft Exchange 2000-2003 Servers from Spam, with Multi-layer Filtering.

For the benefit of the visitors of ITEC, MicroWorld will conduct a Virus Clinic where you get a free checkup of your laptops for malware with 'MWAV' Utility. Free CDs of MWAV will also be presented to the audience at the MicroWorld house.

"Virus writing is not about that downcast youth and his few minutes of fame anymore. It's an international criminal outfit, well organized and remotely managed. And these gangs are after your confidential information, finances and at times your business itself. Spam and Viruses can hit your productivity below the belt, while a 'Denial of Service' attack will bring your daily operations to a grinding halt. In here, a comprehensive protection plan is the wisest choice for Business Continuity and Information Integrity," says Rohini Sonawane.

At the event, you can visit MicroWorld Technologies at Booth no 406, Rock Financial Showplace, 46100, Grand River Avenue, Novi, MI 48374.

MicroWorld: (www.mwti.net) is the developer of the world's first Real-Time AntiVirus and Content Security software eScan for desktops and servers. Its communication security software, MailScan is the first comprehensive e-mail scanner for your SMTP/POP3 Mail Server. MicroWorld Winsock Layer (MWL) is the revolutionary technology underlying these products, powering them to several certifications and awards by some of the most prestigious testing bodies, notable among them being

Virus Bulletin, Checkmark, TUCOWS, Red Hat Ready, and Novell Ready. Combining their powerful scanner with MWL technology, MicroWorld solutions provide a Real-Time Proactive security for your systems. For network security of enterprises, eConceal Firewall is the latest powerful offering from MicroWorld.
