

[Antivirus](#) : Now you can have a good ANTIVIRUS for FREE !

Posted by [Max](#) on 2007/2/9 10:07:43 (66 reads)

MicroWorld Technologies launched a new version of the FREE ANTIVIRUS SOFTWARE - MWAV, compatible with Windows Vista. Its simplicity in use, high scanning speed and comprehensive protection, have all made it quite a rage among many home and office users"

"On one hand, Windows Vista attempts to tighten protection against Virus and other intruders, but on the other, it does throw some challenges for security firms in providing in-depth security for computers running on this Operating System," said Govind Rammurthy, CEO of MicroWorld Technologies commenting on the launch. "Now, with this new version of MWAV, users can comprehensively scan and clean their Vista machines of all sorts of malicious programs".

The PatchGuard characteristic in 64 bit mode of Windows Vista that restricts external access to the kernel and the obligatory digital signature for modules at kernel level, are some of hurdles that Windows Vista poses for Security Firms in providing advanced protection for end users.

The new MWAV Toolkit offers a comprehensive security scan for Information Systems by detecting and cleaning **52 different types of malware, ranging from Virus, Worm, Trojan and Rootkit, to Nuker, Porn Dialer, Adware and Spyware.** With its ability to sniff out any program that's wary or risky in nature, one can be sure that all harmful programs are removed from the computer by running the utility.

"We are currently offering 'MWAV Scan and Clean' for free, as part of our New Year festivities. Its simplicity in use, high scanning speed and comprehensive protection, have all made it quite a rage among many home and office users, as we are getting a flood of requests for the software right now. I'm sure this new Vista compatible version will just add to these volumes," declared Sunil Kripalani, Vice President, Global Sales and Marketing, MicroWorld Technologies.

This **FREE AntiVirus Software** is available at <http://www.mwti.net/products/mwav/mwav.asp>

The four key range of security products offered by MicroWorld Technologies are eScan, MailScan, X-Spam and eConceal.
